

Communicating Effectively Across Cultures: Developing Intercultural Competency Skills

This interactive workshop will be designed to provide participants with valuable knowledge and skills needed to effectively communicate with people across diverse cultural backgrounds. In the increasingly diverse and globalized world that we live in, it is inevitable that we will find ourselves engaged in interactions and relationships with people different from ourselves- both professionally and personally. Because culture influences our perceptions, values, and the ways in which we communicate, misunderstandings and conflict are inevitable in diverse professional settings. This workshop will work to equip participants with knowledge and skills that will help develop intercultural competency and effectively navigate cross-cultural interactions. Participants of this workshop will be exposed to fundamental Intercultural Communication concepts and theories that can encourage productive, inclusive, and culturally competent communication within diverse organizations. ***Communicating Effectively Across Cultures: Developing Intercultural Competency Skills*** is both an awareness building and skill building professional development experience that can help drive inclusion forward within your organization.
